

This section could  
well be omitted here  
and inserted later.

1. Knowledge of science is a prerequisite  
to enlightened behavior.
2. People have to be taught to think  
for themselves.
3. The regimentated learning of the  
school prevents self-initiated and  
self-sustained thinking. <sup>Itself</sup> - via
4. When the mind enters into the organized  
self-knowledge - it finds the organized  
on which to build originality of  
thought.
